

Paraphrasing

- Is my sentence structure & vocabulary completely different from the source's?
- Have I expressed the author's idea correctly?
- Did I cite all my paraphrasing properly?
- Do I have enough citations for my paraphrasing?

(i.e. Did I paraphrase a whole paragraph and only cite it once at the end? That's not good!)

Short Quotes & Long Quotes

- If I copied a few words/a short amount of text, did I use "quotation marks"?
- If I copied a longer amount of text, did I put it on a new line and indent it?
- Did I cite all quotations properly?

Citing: Am I sure I cited all the *ideas* and *information* and *quotes* that I got from...?

- another person
- online sources
- paper sources
- papers that I wrote for another class/purpose

References/Bibliography/Works Cited

- Have I included every source that I cited in the paper?
- Have I included all the information needed for each type of source?

(e.g. books vs. articles; paper sources vs. online sources)
